THOR

Una linea di prodotto che si rinnova nelle linee e nel volume e conferma le prestazioni. Lo spessore rivoluzionario della porta garantisce la massima sicurezza e si presta ad una molteplicità di usi;

è ideale per proteggere, inoltre all'ambiente domestico, anche la privacy degli uffici o locali, ovunque siano presenti dati sensibili.

Disponibile anche in versione doppio battente "DB".

A richiesta con maggiorazione è possibile richiedere le cerniere a scomparsa. Thor è disponibile con Sen.t.in.el, il sistema di sicurezza attiva: in caso di tentata effrazione si attiva un allarme sonoro integrato alla porta.

Il sistema è senza fili: nessun cablaggio o collegamento all'impianto elettrico.

L'avvisatore acustico è ad alta intensità per un allarme di 60 secondi.

La luce di cortesia è in led bianco ad alta luminosità, per poter individuare rapidamente l'interruttore in caso di rientro notturno.

Il Sistema Sen.t.in.el è integrato alla porta: nessun elemento esterno visibile compromette l'estetica della porta.

A product line renovated in its lines and volumes but confirming its performances.

The revolutionary door thickness guarantees maximum safety and lends itself to a multiplicity of uses. It is ideal for protecting offices or premises privacy, wherever sensitive data is present. Available also double door "DB".

On request with hidden hinges. Thor is available with Sen.t.in.el, the active security system: in the event of burglary attempts, a sound alarm, integrated into the door, is activated. System is wireless: no wiring or connection to the electrical system.

A 60 second high-intensity acoustic alarm.

THOR - PERFORMANCE E SICUREZZA AL TOP

La Thor è un riferimento anche per le performance termo-acustiche: trasmittanza termica fino a 0,9 W/m²K e abbattimento acustica fino a 44dB.

Thor is also a reference for thermal-acoustic performances: thermal transmittance until 0,9 W/m²K and acoustic sound insulation until 44dB.

L'unica porta blindata in classe 3 antieffrazione con struttura del battente in acciaio 18/10.

The only class 3 burglar proof security door with 18/10 steel door leaf structure.

Il massimo della sicurezza passiva grazie anche ai suoi 5 rostri antistrappo e antitaglio e ai doppi deviatori.

Maximum passive safety thanks also to its 5 wrench resistant and cut resistant grips and double diverter.

DESIGN MINIMAL

La nuova carenatura square in soli 1,5 cm incornicia la porta come un quadro contemporaneo, che ti accoglie nel tuo ingresso.

New square edge cover in only 1,5 cm frames door as a contemporary painting welcoming you into your entrance

Lo spessore della porta si riduce a soli 6,8 cm permettendo così l'utilizzo anche come porta di sicurezza da interno per uffici e panic room.

FLORENCE

La nuova porta di sicurezza con sistema di cerniere a scomparsa e stipite a filo muro, che unisce tecnologia, stile e design.

Design, attenzioni ai dettagli, funzionalità e prestazioni di alto livello: Florence diventa un elegante elemento funzionale e d'arredo. Disponibile anche doppio battente "DB".

Florence è disponibile con Sen.t.in.el, il sistema di sicurezza attiva: in caso di tentata effrazione si attiva un allarme sonoro integrato alla porta.

Il sistema è senza fili: nessun cablaggio o collegamento all'impianto elettrico.

L'avvisatore acustico è ad alta intensità per un allarme di 60 secondi.

La luce di cortesia è in led bianco ad alta luminosità, per poter individuare rapidamente l'interruttore in caso di rientro notturno.

Il Sistema Sen.t.in.el è integrato alla porta: nessun elemento esterno visibile compromette l'estetica della porta.

The new security door with concealed hinges and flush with the wall frame combines technology, style and design

Design, attention to detail, functionality and high-level performances: Florence, the security door becomes a strong piece of furniture. Available also double door "DB". Florence is available with Sen.t.in.el, the active security system: in the event of burglary attempts, a sound alarm, integrated into the door, is activated.

System is wireless: no wiring or connection to the electrical system.

A 60 second high-intensity acoustic alarm.

The courtesy light is a high brightness white LED to quickly locate the switch in case of night return. Sen.t.in.el system is integrated into the door: no visible external element compromises door aesthetics.

PAROS CLASSE 4

La Sicurezza è nel DNA delle porte blindate Bertolotto. Con le porte in Classe 4 si garantisce la massima sicurezza anche per la protezione di appartamenti signorili o che contengono beni di valore. La scelta delle finiture disponibile permette di inserire la porta sia in un ambiente classico che contemporaneo garantendo la sicurezza di una chiusura tradizionale a cilindro.

Safety is in security Bertolotto door's DNA. With Class 4 doors, maximum safety is also guaranteed for the protection of elegant apartments or in any case with many valuable assets. The choice of finishes available allows the door to be inserted in both a classic and contemporary setting, guaranteeing the safety of a traditional cylinder lock.

PAROS FIRE

La resistenza al fuoco si unisce alla classe antieffrazione in una sola porta. La porta garantisce protezione non solo contro i tentativi di effrazione, ma è anche sicura contro il fuoco, senza rinunciare alla personalizzazione delle finiture per i rivestimenti, maniglia e colori telaio.

The fire resistance joins the anti-burglary class in a single door. Security not only against break-in attempts but also safe against fire, without renouncing the customization of finishes for upholstery, handles and frame colors.

Bertolotto è da sempre attenta ai dettagli. Il valore estetico è percepibile anche nelle finiture. La carenatura o finitura di battuta, realizzata in lamiera plastificata antigraffio, serve a ricoprire e circondare la struttura della porta blindata e a sostenere i pannelli.

Le carenature proposte sono disponibili oggi in 4 colori più 4 laccature per soddisfare ogni esigenza di personalizzazione.

Una vasta gamma che si combina con la tipologia di legno scelta per i pannelli ed i telai, valorizzando anche l'aspetto estetico della porta blindata.

A richiesta possono essere personalizzate nei colori RAL o NCS.

Bertolotto has always been detail-oriented. The aesthetic value is also perceptible in the finishes. The frame made of scratch-resistant plasticized sheet metal, is used to cover and surround the structure of the armored door and to support the panels.

The fairings proposed are now available in 4 colors plus 4 lacquers to satisfy every customization need.

A wide range that combines with the type of wood chosen for the panels and frames, also enhancing the aesthetic appearance of the security door.

On request they can be customized in RAL or NCS colors.

- Schermo LCD 3.2"
- Fotocamera 0.3 MP con angolo di visione a 105 gradi
- Installazione molto semplice
- Spessore della porta da 38 a 110 mm
- Include 2 batterie AAA
- Disponibile nelle finiture argento e ottone

- *View live images of who is at the door*
- *Clear image which can be seen from a distance*
- *3.2" LCD screen*
- *0.3 MP camera with 105 degree viewing angle*
- *Very simple installation*
- *Door thickness 38 to 110 mm*
- *Includes 2 x AAA batteries*
- *Available in silver and brass finish*

AUTO IMAGING (5800)

- Vedi l'immagine in diretta di chi è alla tua porta
- Include sensore di movimento
- Coglie il movimento e scatta una foto o registra un video
- Memorizza con ora e data
- Largo schermo LCD 4"
- Include scheda SD da 4 GB
- Telecamera ad infrarossi con la modalità notte
- Fotocamera 0.3 MP con angolo di visione a 110 gradi
- Campanello integrato
- Spessore della porta da 38 a 110 mm
- Include 4 batterie AAA

- *View live images of who's at your door*
- *Stores images onto internal memory with date and time stamp*
- *Large 4" LCD screen*
- *Infrared night view*
- *0.3 MP camera with 105 degree viewing angle*
- *Integral door bell*
- *Door thickness 38 to 110 mm*
- *Includes 4 x AAA batteries*

MEMORY + (4500)

- Vedi l'immagine in diretta di chi è alla tua porta
- Memorizza le immagini sulla memoria interna con data e ora
- Largo schermo LCD 4"
- Vista notturna a raggi infrarossi
- Fotocamera 0.3 MP con angolo di visione a 105 gradi
- Campanello integrato
- Spessore della porta da 38 a 110 mm
- Include 4 batterie AAA

- *View live images of who's at your door*
- *Includes motion sensor*
- *Picks up movement and takes a photo or records a video*
- *Stores with time and date stamp*
- *Large 4.3" LCD screen*
- *Includes 4GB SD card*
- *Infrared camera with night mode function*
- *0.3 MP camera with 110 degree view angle*
- *Integral door bell*
- *Door thickness 38 to 110 mm*
- *Includes 4 x AA batteries*

SEN.T.IN.EL SEN.T.IN.EL

Sen.t.in.el

L'unica porta al mondo
che mette in fuga i ladri

Luce di cortesia / *Courtesy light*

Alimentazione a batterie / Powered by
alkaline

SEN.T.IN.EL: L'ALLARME ATTIVO NEL CUORE DELLA PORTA

SEN.T.IN.EL: THE ACTIVE ALARM IN THE DOOR'S HEART

Sen.t.in.el rende la porta blindata un sistema anti-effrazione attivo. Sen.t.in.el è applicato all'interno della porta blindata, con la funzione di generare un allarme in caso di tentativo di effrazione.

Non necessita di alimentazione elettrica, ma utilizza pile di facile reperibilità. La porta blindata, con Sen.t.in.el, non solo si oppone, ma "reagisce" ai tentativi di attacco quali perforazione, urto violento, forzatura, emettendo un forte allarme acustico che mette subito in fuga il ladro, evitando l'ingresso in casa.

Sen.t.in.el rende la porta blindata un sistema anti-effrazione attivo. Sen.t.in.el è applicato all'interno della porta blindata, con la funzione di generare un allarme in caso di tentativo di effrazione.

Non necessita di alimentazione elettrica, ma utilizza pile di facile reperibilità. La porta blindata, con Sen.t.in.el, non solo si oppone, ma "reagisce" ai tentativi di attacco quali perforazione, urto violento, forzatura, emettendo un forte allarme acustico che mette subito in fuga il ladro, evitando l'ingresso in casa.

CARATTERISTICHE TECNICHE

TECHNICAL FEATURES

- Sistema senza fili: nessun cablaggio o collegamento all'impianto elettrico. Ciò comporta che Sen.t.in.el non può essere "messo a tacere" dal ladro semplicemente recidendo i fili.
- Alimentazione a pile alcaline: Sen.t.in.el funziona anche in caso di black-out.
- Avvisatore acustico: buzzer piezoelettrico. Alta intensità per un allarme di 60 secondi.
- Luce di cortesia: led bianco ad alta luminosità, per poter individuare rapidamente l'interruttore in caso di rientro notturno.
- Sistema integrato nella porta: nessun elemento esterno visibile compromette l'estetica della porta.
- *Wireless system: no wiring or connection to the electrical system. This means that Sen.t.in.el cannot be "silenced" by the burglar by simply cutting the wires.*
- *Powered by alkaline batteries: Sen.t.in.el also works in case of power failure.*
- *Acoustic alarm: piezoelectirc buzzer. High intensity for a 60 second alarm.*
- *Courtesy light: high brightness white LED light to quickly find the switch when returing home at night.*
- *System built in the door: no visible external elements affect the appearance of the door, which looks like a "normal" security door.*

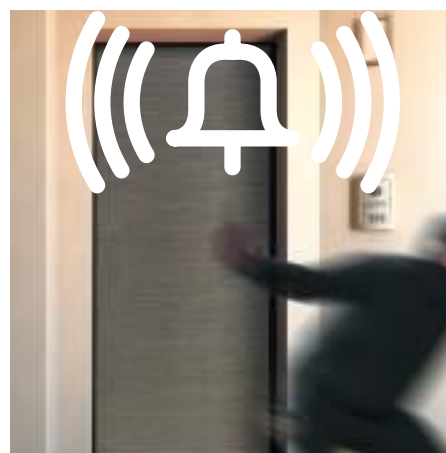

L'attivazione del sistema Sen.t.in.el avviene in simultanea e con fuoriuscita dei deviatori. Nessuna complicata operazione, nessun nuovo gesto di cui ricordarsi.

The Sen.t.in.el system is activated simultaneously with the operation of deadbolts. No complicated or new operations to be remembered.

L'allarme scatta puntualmente ad ogni tentativo di effrazione: foratura con trapano, colpi violenti di martello o altri oggetti contundenti o con rimozione del defender.

The alarm goes off at each intuder attack: drilling, violent blows with a hammer or other blunt objects or removal of the defender.

L'avvisatore acustico genera un allarme di forte entità per 60 secondi solo in occasione di vero tentativo di effrazione. Nessun rischio di falso allarme in caso di urto innocuo della porta.

The buzzer produces a loud alarm for 60 seconds only after a real burglary attempt. No risk of false alarm if the door is lightly hit.
